

Nahid Hasan

Senior Software Engineer

Dhaka, Bangladesh | nahidprince7@gmail.com | +8801683805972

LinkedIn: [Profile Link](#) | Portfolio: [nahidhasan.online](#) | GitHub: [Profile Link](#) | [Video CV](#)

Senior Full-Stack Engineer with 9+ years of experience delivering high-quality web applications for international clients, including enterprise-level Japanese markets. Proficient in PHP, Laravel, Vue.js, React, AWS, and modern DevOps practices. Experienced in AI-augmented development, microservices architecture, and leading cross-functional teams. A collaborative team player who continuously learns and adapts to new technologies with a strong commitment to quality and timely delivery.

Skills

PHP | Laravel | ReactJs | NextJs | VueJs | C# | MySQL | PostgreSQL | SQL Server | REST API | Bootstrap | Tailwind CSS | Git | PWA | Nginx | CI/CD | Docker | AWS (EC2, S3, RDS, SES/SNS, Lambda) | Redis | RabbitMQ | Agentic AI | Prompt Engineering

- All professional proficiency or above

Familiarity with TypeScript | Microservices | WebSockets | Event-Driven Architecture | NoSQL Database

Professional Experience

ChefOnline Partners (Amber Software Solutions) | Sr. Full Stack Web Developer

Dhaka, Bangladesh | Aug, 2026 - Current

- Own complete project lifecycle as the sole full-stack engineer, from first client requirement session through production deployment and ongoing maintenance.
- Conduct requirement analysis and system design, producing architecture decisions, ERDs, and API contracts that keep delivery predictable on a one-person team.
- Lead pre-development R&D and architecture mapping for BAFH, a UK trade-federation membership platform connecting thousands of Asian restaurant and hospitality businesses with industry suppliers, monetized through sponsorship and a national awards event.
- Develop scalable backend services and responsive frontends with Laravel and React, maintaining code quality standards without peer-review overhead.
- Manage deployment and infrastructure end to end — Nginx configuration, CI/CD automation, environment parity, and monitoring — while serving as the single technical point of contact for clients, translating feedback into scoped, shipped releases.

DreamOnline Limited | Sr. Software Engineer

Dhaka, Bangladesh | May, 2021 - July, 2026

- Spearheaded AI-augmented development using Claude Code and Kilo, accelerating feature delivery by 30% and reducing QA cycle time across a 6-member engineering team.
- Architected and delivered a high-performance enterprise system for a leading Japanese client (Tokisuki) using Laravel, Vue.js, and AWS infrastructure, generating \$5M+ in annual revenue.
- Led end-to-end system design and SDLC for scalable microservices, achieving 99.9% uptime through Nginx load balancing, CI/CD pipelines, and AWS infrastructure.
- Designed and maintained 250+ RESTful APIs and built dynamic interfaces using Vue.js following agile/scrum methodologies with regular code reviews.

BRACNet Ltd | Web Developer (Sr. Executive)

Dhaka, Bangladesh | May, 2019 - May, 2021

- Developed and deployed 150+ secure RESTful APIs and responsive frontend interfaces using Laravel and Vue.js.
- Standardized dev-to-production workflows using Docker containerization on CentOS VMs, reducing deployment time by 40% and eliminating environment inconsistencies.
- Collaborated in scrum ceremonies and performed code reviews across a cross-functional team, ensuring on-time delivery of sprint goals.

Commlink InfoTech Ltd | Web Developer

Dhaka, Bangladesh | Jun, 2017 - May, 2019

- Built and maintained 10+ client-facing web applications using PHP, Laravel, and ASP.NET with focus on system design, performance optimization, and long-term reliability.
- Specialized in WordPress plugin and theme customization, delivering tailored CMS solutions for SME clients with measurable improvements in page load speed.

- Managed Magento e-commerce builds including hosting configuration, backup automation, and deployment across retail and services sectors.

Education

United International University | M.Sc. in Computer Science and Engineering

GPA: 3.47 | Passing year : 2016

- Dhaka, Bangladesh

Ahsanullah University of Science and Technology | B.Sc. in Computer Science and Engineering

GPA: 2.96 | Passing year: 2013

- Dhaka, Bangladesh

Recent Projects

YourBot – Multi-Tenant SaaS AI Commerce Platform (USA)

yourbot.3dotsoft.xyz

Role: Project Architect (React.js, Laravel, PostgreSQL, AWS, Docker, Agentic AI, Deepseek | OpenAI)

- Led end-to-end development of an autonomous AI conversational commerce platform for Facebook Messenger for international markets.
- Implemented an intelligent negotiation engine, real-time inventory verification, and seamless human-to-AI takeover protocol for optimized sales automation.

RENAISSANCE Reservation System – Sports, GYM, Yoga Facilities Hub (Japanese)

user.reserve-sportsoasis.jp

Role: API Team Lead (Lumen, Vue.js, PostgreSQL, Modular Monolith, AWS)

- Led consolidation of 7 legacy Japanese reservation monolith platforms into a single hub with 70+ RESTful APIs.
- Reduced operational overhead by 60% for 100,000+ monthly active users.

Tokisuki – Luxury Watch E-Commerce (Japanese)

tokisuki.com

Role: Project Lead (Laravel, Vue.js 3, PostgreSQL, Tailwind CSS, AWS, Docker)

- Led development of the flea market section for a full-stack luxury watch platform for the Japanese market.
- Implemented dynamic product filtering and pixel-perfect responsive UI.

KANEBO Navigator – AI Skin Analysis Tool (Japanese)

kanebo-global.com

Role: Full-Stack Developer (Laravel, Vue.js 2, MySQL, AWS, Docker)

- Developed an AI-powered skin analysis tool for global cosmetics brand KANEBO (Kao Beauty Brands, Japan).
- Enabled multilingual skin assessment via facial photo analysis for international markets.

Infor Syteline – ERP (USA)

infor.com

Role: Full-Stack Developer (C#, VB.net , SQL Server)

- Designed and modified ERP workflow as per client's requirement.
- Written stored procedures, triggers & Custom C#/VB scripts for new functional implementation.

MangoRides – Ridesharing & Car Rental Platform

mangorides.com

Role: Full-Stack Developer (Laravel, REST API, iOS/Android backend, AWS, Docker)

- Designed and developed the admin panel and RESTful APIs for a ridesharing platform supporting iOS and Android.
- Built scalable backend services to manage ride booking, fleet management, and user operations.

WEBGYM – Fitness & Exercise Habit App (Japanese)

play.google.com

Role: Full-Stack Engineer (Laravel Mix, PostgreSQL, AWS, Vagrant)

- Built an Android app for the Japanese market with 100K+ downloads as a WebView shell around a Laravel and Vue.js application, originally a Sports Oasis product and now published by Renaissance Co.
- Owned the API layer end to end, from Swagger specification through development and integration.

weltag – True Nature Meditation (Japanese)

play.google.com

Role: Full-Stack Engineer (Laravel Mix, Vue.js, PostgreSQL, AWS, Vagrant)

- Worked across both frontend and backend for a Japanese wellness and meditation platform, also shipped as an Android app on Google Play.

- Built Vue.js interfaces alongside the REST API, handling the full lifecycle from Swagger documentation through development and integration.

eBidyaloy – EdTech Learning Platform

ebidyaloy.com

Role: Full-Stack Developer (Express.js, Next.js, Tailwind CSS, Zustand, AWS, Docker)

- Developed complex web functionalities and interactive using Next.js to enhance user engagement
- Engineered high-performance interfaces and resolved technical challenges for a scalable educational platform.

TableTap – QR Menu Ordering System

tabletap.xyz

Role: Full-Stack Developer (Express.js, Next.js, Tailwind CSS, Zustand, AWS, Docker)

- Architected reusable UI components and responsive layouts.
- Collaborated with backend teams to integrate APIs for real-time menu and order management.

Attendance Management System (BRACNet)

attendance.bracnet.net

Role: Full-Stack Developer (Laravel, Vue.js 2, MySQL, CentOS VPS)

- Designed and built a full-stack attendance management system from the ground up using Laravel Mix, Vue.js 2, and MySQL on a CentOS VPS.
- Integrated the system with legacy databases holding multi-year attendance records to ensure continuous data integrity.
- Developed mobile-friendly remote attendance for off-site staff and an administrative workflow for managers to modify and manage records.

Inspection Management System (BRACNet)

metromakers.com

Role: Full-Stack Developer (Laravel Mix, REST API, PWA, CentOS VPS)

- Conducted requirement analysis, project architecture design, ERD, and server setup.
- Designed and developed the admin panel and frontend using Vue.

BRACNet Website Development

bracnet.net

Role: Full-Stack Developer (WordPress, Elementor, MySQL, VPS)

- Designed and developed the whole site as per the XD design.
- Configured all plugins and implemented the payment gateway and custom blog setup.

Shanta Utopia SPA (Shanta Holdings)

shantautopia.com

Role: Full-Stack Engineer (WordPress, cPanel, Theme & Plugin development)

- Requirement analysis and system design, then PSD to HTML to theme development.
- Handled deployment and ongoing maintenance.

EduTech Platform – Newton Dream School

newtondreamschool.org.bd

Role: Full-Stack Developer (Joomla CMS)

- Developed complex web functionalities and interactive modules using Joomla to enhance user engagement.
- Engineered high-performance interfaces and resolved technical challenges for a scalable educational platform.

Training & Certifications

- **Training on Modern JavaScript (ES6)** — BITM (2021)
- **Web App Development with Laravel & Vue (Batch No: 3)** — BITM (2019)
- **Mastering Customer Service** — BACCO (2017)
- **MCTS 70-515: ASP.NET 4 Web Development** — AIUB (2012)
